

Sestri Ponente dedicated truck parking area: construction works completed

09 March 2022

The expansion of the dedicated truck parking facility adjacent to the Airport has been completed on schedule.

The Western Ligurian Sea Port Authority has concluded the renovation and expansion, alongside the Genoa City Airport, of the truck parking facilities which now feature a total surface area of 6000 sqm. The layout has optimised parking capacity for heavy vehicles serving the Port of Genoa container terminals, and additional spaces will shortly be made available to road-hauliers. Safe and secure, the parking area is video-monitored by the Airport Control Room.
